

YOUR INTERNET, OUR PRIORITY

THE CIRRA NETWORKS
DIFFERENCE

Cirra Networks is a leading Internet service provider headquartered in Fort Worth, Texas. We provide residential and business customers with high speed internet access, network services, and exceptional customer care. Currently, we are servicing over 4,000 square miles, and our coverage expands monthly.

YOUR INTERNET, OUR PRIORITY

Cirra has several technologies to deliver internet access, and we continue to make large investments in advanced networking technology to maintain the reliability of your wireless service. If a segment of our network becomes impaired, your connection is maintained automatically through intelligent re-routing and redundancy. We rest assured and you should too.

MORE CHOICES, NO RISK

In addition to more technology options, you can choose from several service plans designed to match your needs, and if you prefer to pay month to month without a two-year contract, we offer that option, too. No other regional provider offers everything we do with a satisfaction guarantee.

WHEN YOU NEED US

Today, it seems that customer support has become an afterthought to many companies. Cirra Networks wants to reverse that trend and make customers feel valuable again through exceptional customer care.

OUR MEMBER NETWORK

Cirra Networks is made up of a growing list of member companies who have been operating independently in North Texas for years. Together, we are able to offer more services, faster installations, better pricing, and more responsive customer support than ever before. Member companies certified by Cirra Networks are recognizable by the Cirra Networks Member logo.
